Election Requirement

This application contains claims directed to the following patentably distinct species of the claimed invention: **Numerous compositions.**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, **inventions comprising a spinosyn or derivative therefore, an alkyl alkanoate spreading agent, a miscibilizing agent plus an organic solvent** is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected (**Elect a specific spinosyn compound, a specifically named or completely defined alkyl alkanoate, a specifically named or completely defined spreading agent and a specific organic solvent. If additional ingredients (usually in further comprising claims) are desired, Examiner is requesting that Applicant specifically name or completely define additional ingredients. If additional ingredients are not specifically named or completely defined, claims comprising those ingredients will be classified as non-elected claims.**) consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations

Art Unit:

of an allowed generic claim as provided by 37 CAR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to **Attorney Demeter** on 6/2/03 to request an oral election to the above restriction requirement, but did not result in an election being made.
